

SEMESTER 2

Week	What did you do this week?	What will you do next week?	Anything blocking your progress?	Would you like to schedule a discussion?	Preferred meeting time
2	Import/Export debugging up until nginx, tokens using jwt working correctly	nginx	No	Yes	3:00:00 PM
2	Import/Export progress with William	Connecting front end UI with back end functionality	No	Yes	4:00:00 PM
2	User from a different journal can log into ours(pending testing) and set up the routes pending testing until nginx utilase	User from a different journal can log into ours(pending testing) and set up the routes pending	No	No	3:00:00 PM
2	Downloading files from posts	Keyboard shortcut and user profile	No	Yes	3:00:00 PM
2	Downloading posts.	Online post editor; Saving and Uploading new changes.	No	No	3:00:00 PM
3	nginx working on my user account	nginx on group account and finishing supergroup import export	No permissions to group account	No	3:00:00 PM
3	Connecting front end UI to actual backend functionality (mainly APosts.js functionality)	Work on features on the posts page and continue connecting them with backend functionality	No	Yes	3:00:00 PM
3	Fixed bug which let your access login with the incorrect password	Carry on with super group login but for our users to log into other supergroup	Got a networking practical and injured my knee so might not b	Yes	3:00:00 PM
3	Keyboard shortcuts in progress	User profile and metrics	Covid-19	Yes	3:00:00 PM
3	Online post editor with saving and uploading changes.	Favorite; Individual posts page; Deleting posts.	No	No	3:00:00 PM
4	Worked on the deliverable- Created routes for super group login authentication - Organised supergroup testing for the	Finish off the supergroup login and testing	Network practical due on Friday	No	3:00:00 PM
4	Implemented nginx, wrote scripts to assist development of website	Continue writing scripts to assist on development, supergroup import/export	No	Yes	3:00:00 PM
4	Deliverable 3 - Scrum report sectionKeyboard shortcuts in progress	Finish keyboard shortcutsStart working on user profiles and metrics	Covid-19	Yes	3:00:00 PM
4	Favorite; Individual posts; Deleting.	Voting	No	No	3:00:00 PM
4	Setting out plans for the super group login protocol and cleaning up code form the initial attempt	Work on function that lets user from a different journal log into ours	No	No	3:00:00 PM

SEMESTER 1

Week	What did you do this week?	What will you do next week?	Anything blocking your progress?	Would you like to schedule a discussion?	Preferred meeting time
4	Product backlog for program and technologies - languages section	Start coding	AI Practical 1 was but not anymore	No	11:00:00 AM
4	*Super group meeting about authentication*analysis of front end tools	Start programing	deadline - on Friday	Yes	10:00:00 AM
4	Write report for deliverable 1.	Deciding implementation techniques and allocation of tasks with team mates. Start to write initial	I might have to focus on my two practicals due week 5, but I w	No	11:00:00 AM
4	- Scrum Meeting- Write Scrum section of the report for Deliverable 1	- Start working on the database design- Add schema for database design	No	Yes	11:00:00 AM
4	Filled in core requirements, additional requirements, setup the gitlab. Doing overview of semester 1 plan after scrum me	Will be discussed in scrum meeting	Deadlines?	Yes	11:00:00 AM
5	Server-side input validation for register, minor fixes, customErrors.js and validate.js	register users server side + post input validation	no	Yes	10:00:00 AM
5	- Database design for users and posts- Testing of the database- Set up database on MariaDB	- Create database getter and setter functions- Debugging and testing	No	Yes	11:00:00 AM
5	Completed Register fully and begun looking at the front end	overhaul the filesystem and code for frontend	no	Yes	10:00:00 AM
5	Database design; Agent/Proxy Design mode	Database and server connection.	N/A	No	1:01:00 AM
6	Worked on front-end to create basic user interface and establish communication between client and server to enable u	Work on front-end to enable user to submit code	Nothing massive	No	11:00:00 AM
6	- Researched the generation of unique user IDs	- Backend of the login form for the user	No	Yes	11:00:00 AM
6	Database setup; Users table setup and basic users operation.	Provide more functionalities of database; interacting database with backend server.	N/A	No	11:00:00 AM
6	Set up the wiki and the repo for the next deliverable	Begin work on the web interface using react	*waves arms at everything*	Yes	12:00:00 PM
7	Optimize Server and Front-end. Debug. Automatic tests. Three basic Object Class. (Post, User, Comment)	Server and Database connection. Fron-end Backend connection.	N/A	No	2:02:00 AM
7	- Started working on login- Researched about hashing passwords in Javascript- Understand bcrypt documentation	- Debug login - Understand util functions for backend	No	Yes	10:00:00 AM
7	Post functionality - front end	Login functionality	Non as of yet	No	9:00:00 AM
7	front end overhaul, file cleanup, and nav bar + css	file uploading	no	Yes	10:00:00 AM
8	DB part of Comment. Tests.	Tests; Report; etc.	N/A	No	11:00:00 AM
8	- Login validation functions (user ID and password validation)	- Debugging and fixing current code issues- Report and wiki documentation	No	Yes	10:00:00 AM
8	Login - front end	Login for super group	None	No	10:00:00 AM
8	content uploading + issue resolving + bug fixing	start on report, fix more issues and help where I am needed	no	Yes	10:00:00 AM
9	- Write report for Deliverable 2- Testing and documentation- Login verification debugging	- Scrum reflection meeting	No	Yes	10:00:00 AM
9	Frontend Interface Design. Backend Frontend communication.	Submit Deliverable2. Supergroup login.	N/A	No	3:03:00 AM
9	Login-supergroup	Improve front end presentation	Deadlines for other moduels	No	10:00:00 AM
9	started on report and content migration	continue on report and content migration alongside anything else that needs doing until we sumy impending doom		Yes	10:00:00 AM
