Weekly Progress Report

Week	SEMESTER 2			
	What did you do this week?	**What will you do next week?**	**Anything blocking your progress?**	**Would you like t Preferred meeting time**
5	Bug fixes, work on the front end, fixing UI problems and making the website more aesthetically pleasing	May not get much done due to deadlines but User Metrics and home page side bar are my main priorities	deadlines	Yes 15:00:00
5	Wrote report, got export working, working on import, brought project in line with fixit	finish import and other tasks in planner	deadlines	Yes 15:00:00
5	Fix bug;Search	History Table in Database; post ranking	No	No 15:00:00
5	Working on Deliverable 3	try to start to get my head around nginx and using that to implement functionality for super group login	practical that are due next week	No 15:00:00
5	Downloading posts and researched syntax highlighting for post source code	Refine front end pages and UI elements	Deadlines	Yes 15:00:00
6	Tags; Advanced searching for users posts journals and tags;	Start RS	No	No 15:00:00
6	unable to do work due to deadlines for all other modules	continue working on import export	previously it was deadlines	No 15:00:00
6	I wasnt able to do a lot of work this week due to incoming course work but still managed to look at how the nginx site would work	try to fully implement other users logging into our journal	no	No 15:00:00
6	nothing worthy of mentioning for the group projects, deadlines were king this week	continue where I left off	deadlines	Yes 15:00:00
6	Refined front end pages and UI elements	Help and documentation pages for better user onboarding	Deadines	Yes 15:00:00
7	Reading RS paper	Start to implement RS	No	No 15:00:00
7	Fixed a few bugs with registration and implemented functionality that lets users from other super groups login into our system	try to implement notification feature	making a start on Networking practical	No 15:00:00
7	side bar, bug fixes, maintenance, covering of edge cases and things we forgot to cover	a basic footer plus work on additions to sidebar. probably going to do more maintenance as well	no	Yes 15:00:00
7	startup script now accommodates group account, import is now receiving posts, general debugging	continue working on import export	the protocol	No 15:00:00
7	Keyboard shortcuts, manual testing and bug fixes for comments	Pop-up modal for user accessibility and instant support	No	Yes 15:00:00
8	Recommendation System part I	RS part II	No	No 15:00:00
8	started on history, footer + css, started on stats, nav bar improvements plus fixes, other bug fixes and css fixes	viewing history	no	Yes 15:00:00
8	Implemented notification functionality so the user would receive an email every time a comment is made on their post. Could try to extend it further so they can view it on their account as notification instead of just emails.	Implementing Password recovery	nothing	No 15:00:00
8	Rewrote the pathing in nginx to accommodate the supergroup protocol as previous implementation would not have allowed it, reflected changes in relevant files. Progressing on export.	Continue working on import export	Yes	No 15:00:00
8	Help menu modal, keyboard shortcuts, user accelerators	User walkthrough and onboarding tour with tool tips	No	Yes 15:00:00
9	Connect RS to Server; Video; Image supports; Syntax highlighting	Report and evaluation	No	No 15:00:00
9	User onboarding tour, help and documentation page	Tooltips and human computer interaction review	No	Yes 15:00:00
9	Created more comprehensive logs in the supergroup files to help better understand how things are flowing. setup script now also sets up python libraries for the recommender system, startup now works properly with no errors, exported files working as intended	continue working on import export	deadlines are back yet again	No 15:00:00
9	Viewing History, started on report, user statistics, export option expansions, css fixes, viewing history css and formatting, bug fixing	report and finalize project	my brain being out of juice	Yes 15:00:00
9	Implemented and tested forgotten password functionality on the local host. need to migrate it to nginx	Allow our users to login to other journal using their login	nothing	No 15:00:00
10	Report and Evaluation	Demo if there is one	No	No 15:00:00
10	Import export now works fully with another team, users are now also exported if asked for, filled in my sections of the report	demo	Yes.	No 15:00:00
10	Read me, report, helped with finishing import export, finished stats, comments, cleanup	presentation to alex, also going to struggle through complexity	no	No 15:00:00
10	Implemented functionality that enables users to login to other journals using their home login and worked on the report : super group login, user , notification and conclusion.	prepare demo	other practicals	No 15:00:00
10	Human computer interaction review and heuristics analysis	Demonstration, supergroup and review meeting	No	Yes 15:00:00
